Information Systems graduate candidate (final thesis defense completed) with hands-on experience across the full software development lifecycle, building web and ERP applications with PHP/Laravel/CodeIgniter, Golang, and NestJS on the backend, and Angular/Vue on the frontend. Skilled in RESTful API design, manual functional testing, API testing with Postman, and SQL-based data verification for MySQL and PostgreSQL. Proven track record as a full-stack, backend, and frontend developer, and as a QA/tester shipping modular architecture across multiple tech stacks and resolving functional defects under deadline.

WORK EXPERIENCE

PT Pos Satu Nusantara — Banten

Jun 2025 – Aug 2025

Software Engineer Intern

- Developed and maintained ERP modules for PT Ebako using CodeIgniter (PHP), PostgreSQL, and JavaScript, improving efficiency of inventory, procurement, and sales processes through structured data modeling and modular architecture.
- Designed and consumed RESTful APIs connecting ERP modules, and validated endpoints with Postman through manual functional and API testing prior to release.
- Optimized inventory, procurement, and sales workflows through relational database modeling and modular backend design, replacing manual cross-department reconciliation with a structured, automated process.

PROJECTS

TaskFlow — Collaborative Kanban Board Application

Personal Project, 2026

Full-Stack Developer | Java Spring Boot, React + TypeScript + Vite, MySQL, JWT

- Independently built a full-stack, Trello-style kanban board application end-to-end covering board, list, and card management with drag-and-drop task organization and position persistence using Java Spring Boot on the backend and React + TypeScript + Vite on the frontend.
- Implemented JWT-based authentication with Spring Security, role-based access control (Admin vs. Member), and BCrypt password hashing, backed by Spring Data JPA/Hibernate for MySQL persistence.
- Built team collaboration features email-based board invitations, owner/member roles, card labels, and threaded comments and an admin panel with platform-wide statistics, user management, and board moderation.

TechMart — Full-Stack E-Commerce Application

Personal Project, 2026

Full-Stack Developer | Golang, Gin, GORM, Angular, MySQL, JWT

- Independently built a full-stack e-commerce platform end-to-end, covering the complete business flow authentication, product catalog, cart, checkout, manual payment, and an admin dashboard using Golang/Gin/GORM on the backend and Angular 18 on the frontend.
- Implemented JWT-based authentication with role-based access control (Admin vs. Customer), bcrypt password hashing, and Angular route guards to enforce authorization on both the API and client sides.
- Built an admin dashboard with Chart.js visualizations for revenue, best-selling products, and order status breakdown, alongside product, category, order, and customer management tools.

Ferry Ticketing System — Ajibata–Ambarita Route, Lake Toba

Personal Project, 2026

Full-Stack Developer | NestJS, TypeORM, MySQL, Vue 3, PrimeVue

- Developed a full-stack ferry ticket booking system for the Ajibata–Ambarita route supporting three roles Admin, Harbor Staff, and Customer using NestJS/TypeORM on the backend and Vue 3/PrimeVue with Pinia on the frontend.
- Built the ticket booking flow with real-time vehicle quota validation, and implemented QR-code e-ticket generation for harbor check-in.
- Managed core reference data (ships, ports, routes, schedules) and implemented an admin dashboard with revenue charts and CSV export reporting.

Academic System for SSC Balige — Del Institute of Technology

Jan 2025 – Jun 2025

Full-Stack Web Developer | Laravel, MySQL, Figma, Tailwind CSS

- Built an integrated information portal, material repository, discussion forum, and student management system adopted as the primary academic hub for SSC Balige students and staff.
- Enhanced user access control and optimized database queries, noticeably reducing page load times during peak usage periods.

Full-Stack Web Developer | [Laravel](#), [MySQL](#), [Figma](#), [Bootstrap](#)

- Developed an academic archive system with document categorization and role-based user access management.
- Implemented keyword-based search and optimized backend queries, making document retrieval noticeably faster for end users.
- Ran manual functional and API testing (Postman) against test cases, documented results, and resolved the functional defects identified before launch.

EDUCATION

Del Institute of Technology — Sitoluama, Sumatera Utara

Sep 2022 – Sep 2026

Bachelor of Information Systems, GPA 3.02/4.00

CERTIFICATIONS

- Associate Data Scientist Vocational School Graduate Academy, Digital Talent Scholarship (2025)
- TOELF ITP Score 460 (August 2025)

TECHNICAL SKILLS

Programming: PHP, JavaScript, Dart, Java, Python, C/C#, HTML, CSS, Bootstrap, Tailwind CSS, React + TypeScript + Vite, Angular, .NET, Golang, Java Spring Boot

Frameworks & Tools: Laravel, CodeIgniter, React, Vue.js, NestJS, Gin, GORM, TypeORM, Spring Security, Spring Data JPA/Hibernate, Maven, dnd-kit, Flutter, Node.js, Git, Postman, Android Studio

Database: MySQL, PostgreSQL, SQL Server, MongoDB

Engineering Practices: RESTful API Design, Manual Functional Testing, API Testing with Postman, Database Optimization, Defect Resolution

Soft Skills: Attention to Detail, Adaptability, Collaborative Teamwork, Eager to Learn

Languages: Indonesian (Native), English (Intermediate)
